CLAIMS

1. Method for inserting a new device (x) in a community of devices wherein each device of the community is able to store insertion requests received from at least one new device and to forward these insertion requests to a device (b) chosen by a user (3) of the community for confirming authorization to join the community.

2. Method according to claim 1, wherein insertion requests contain a provable identity of the new device.

3. Method according to claim 2, wherein the device having received an insertion request from a new device is able to forward the provable identity of this new device to the device chosen by the user further to the receipt of a message ("see_pendings") from said chosen device (b).

4. Method according to claim 3, wherein the device having received an insertion request from a new device is further able to broadcast the provable identity of the chosen device (b) to the new device (x).
